Day 2

Watch this ted Talk with subtitles and summarize the main points of the Talk in writing and send me.

This Ted movie was about a technologist, farmist and even fascinating engineer. He introduced himself as Marcin Jacuboski. His nationality is American, But when I think of his name, I guess the root of his name may be a Russian name! His last name reminds me of a Russian mathematician Nikolai Lobachevsky!

In Ted talk he talked about open-source blueprints for civilization.

How did he figure out this amazing idea?

In farming, he has a tractor. While working on his farm, Tractor broke! He paid for repairing the tractor. But after some days the tractor broke again. So he broke himself too . He was thinking about what to do and what not to do?

Finally he create a new tractor that it's price was one to ten of a real tractor. The tractor has a strong design and plowing his farm with new tractor! After that he desinged other design for different topics like bread ovens, circuit makers and such things.

All software and hardware designed was published as open-source product in 2011. I think his work is very useful and valueable for all the world. Because different countries need such blueprints designs for making their ideal tools.

Day 6

Listen to this podcast and write down 15 new words that you learn.

Overtourism

When local people complain about too much tourism in the city they will even be angry like in Barcelona.

Tourism shaming

When a tourism suddenly break a tradition, cultural or religion rules unintentionly!
Bachelor party A leader of this party is a singular person!
