https://www.ted.com/talks/george_zaidan_and_sajan_saini_how_are_microchips_made

From Zero second till 60 second.
This is a computer chip. Magnified fivie hundred times. when we are looking at top computer city. This thing neighborhood is different functions. They link by up two

hundred kilo meters of everything copy lines. Write cross ten more stack levels and in the very bottom billion electronic devices generated and digital traffic on processing chip. The most convenient device is called transistor. It is a switch like current flow refusing voltage. Transistor can be small twenty nano meters.and more than fifty billions can fill on a single chip. ....lubily(*) we produce more than a trillion computer chips every year. That's about twenty trillion transitor is build every second and it downs future five hundred plans and how is fabs. how is build many ....
